

Another[®] Country

Accessories

Another Country makes contemporary craft accessories. Our designs are inspired by archetype, calling on the familiar and unpretentious forms of British Country kitchen style, Shaker, traditional Scandinavian and Japanese woodwork for inspiration.

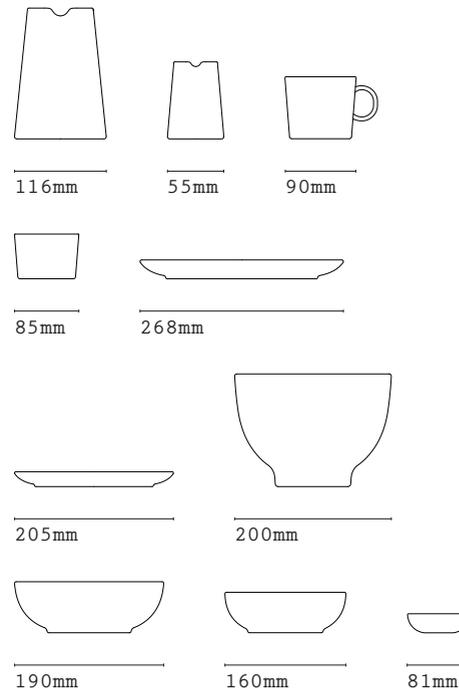

We believe in good design, longevity and sustainability and apply this ethos and attention to detail to the design and manufacture of our ever growing accessories range, from a hand crafted yet hard working tableware collection to essential desktop accoutrement and candlesticks.

Pottery Series

This set of tabletop pottery employs different clay bodies with different properties for each type of vessel and its particular use. Independently, each individual object has multiple functions and together the series is intended to fulfill all basic tableware needs. The forms of the pottery draw inspiration from the Series One furniture collection and are dictated by the most logical solutions for use and manufacture whilst the clay bodies are each tactile and hardworking.

Pieces in the Another Pottery series include a terracotta Pitcher and Serving Bowl, creamy stoneware Dinner Plate, Side Plate, Big Bowl, Little Bowl, Mug, Cup and Creamer and a black clay Pinch Pot.

Desktop Series Two

This covetable set of accessories will make sure any table or desktop is looking its best. Made from solid maple and using swathes of brass to stunning effect, the series includes a stackable paper tray and two different pen and pencil holders. These beautifully crafted pieces are desktop architecture, designed to punctuate your workstation with a hint of something special.

Ceramic Candlesticks

This family of candlesticks is both charming and useful. Their neat ceramic lids lift to reveal a concealed box, perfect for hiding away or keeping belongings safe. The lid sits atop a turned oak base with handle – our take on the classic 'wee willie winkie' candlesticks. The candlesticks are available in three sizes: Small, Medium and Large.

Candle Plate

The Candle Plate is made of terracotta and then fired to an unconventionally high temperature. This vitrifies the body of the clay, giving it the strength of stoneware and achieving the scorched colour. Made in Sri Lanka
